	Description of Bug	Location of Bug	Steps to Recreate Bug and/or Test Case#	Root Cause Analysis Notes
1	Format of the unique time specifier for the audit and summary files is formatted abnormally for minutes 0-9. For example, the expected file name should be "media_summary_irv_election_14_3_2021_4:01:53.txt" for a file created on March 14, 2021 at 4:01 pm at 53 seconds. However it currently looks like "media_summary_irv_election_14_3_2021_4:1:53.txt"	In CreateTime() located in the main.cpp file from lines 58-108.	Can be recreated by running Test Case ID# main_test_1	Root cause of this could be coming from the formatting of the time struct library from the C/C++ library.
2	Sometimes the candidates will have a rank of -1 when running the oplv election class	In OPLVParty::UpdateRank	Can be recreated by running TestCase ID# oplv_party_1 or oplv_candidate_1	The algorithm in UpdateRank is not updating the ranks of the candidates in the OPLV election.
